Title: EFFECTS OF POLLUTION, LOW TEMPERATURE AND INFLUENZA SYNDROME ON THE EXCESS MORTALITY RISK IN WINTER 2016-2017

Version: 0 Date: 29 Jun 2019

Reviewer: Aabid A. Ahmed

Reviewer's report:

Abstract: Please explain what is influential syndrome. In the results section the word where should be replaced with were. In the methods section, there is no mention of vaccination. It is introduced in the conclusion. The conclusion can only conclude what is being studied.

The number of tables can be reduced by either combining some or reducing.

It may be good to compare data over a few years than simply comparing it over two years and drawing conclusions from this.

The conclusion seems to be too general. This needs to be revised and make it specific to the study.

Are the methods appropriate and well described?
