Reviewer’s report

Title: Real life management of Community-Acquired Pneumonia in adults in the Gulf region and comparison with practice guidelines: a prospective study

Version: 2  Date: 3 June 2015

Reviewer: Maher Almatar

Reviewer’s report:

Overall, the authors responses to the comments are very well. the only thing that I am still not convinced with is the sample size form countries other than UAE. Although this has been mentioned in the limitation part, I think this need to be explained more. Other than that the authors did a great job for this version.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
