Interesting data.

I have the following comments:

1. informed consent process needs to be mentioned in the methods section

2. Conclusion of the abstract should be modified to e.g. short-term use of HFOT is safe...... Long-term studies are needed to assess safety, tolerability, and clinical efficacy.

3. Capillary PO2/PCO2 or PaO2/PaCO2 (in the methods you mention it is capillary)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
