Reviewer’s report

Title: Can high-flow nasal cannula reduce the rate of reintubation in adult patients after extubation? A meta-analysis

Version: 1 Date: 24 Aug 2017

Reviewer: Gonzalo Hernandez

Reviewer’s report:

In my opinion the manuscript has been clearly improved. I consider that this meta-analysis is the first one in reporting a significant reduction in the reintubation rate with HFNC compared to COT, including an adequate selection of published trials.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
