Reviewer’s report

Title: Test-retest repeatability of child's respiratory symptoms and perceived indoor air quality - Comparing self- and parent-administered questionnaires

Version: 0 Date: 18 Sep 2017

Reviewer: Nuno Neuparth

Reviewer’s report:

Authors use a reference from 1998 [ref 4] to state that "Indoor air questionnaires used today are validated with adult workers, but not with children". I suggest that this reference should be replaced by another more recent.

In the second line of the paragraph "Background" particular matter should be replaced by particulate matter.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
