Reviewer’s report

Title: The association between circulating adiponectin levels, lung function and adiposity in subjects from the general population; data from the Akershus Sleep Apnea Project

Version: 1 Date: 02 Feb 2018

Reviewer: Albertina Capelo

Reviewer's report:

You have done a hard and interesting work.

Line 56 should be waist-hip-ratio

I would like to know if the authors tested other abdominal adiposity anthropometric measures other than waist to hip ratio?

And I would like to see some discussion about this variable (abdominal adiposity), since it reflects circulating adiponectin levels.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
