Title: Postpneumonectomy-like syndrome due to bronchial carcinoid: a unique case report

Version: 0 Date: 25 Sep 2018

Reviewer: Haala Rokadia

Reviewer’s report:

This manuscript is a well written case report and review of a young patient with complete endobronchial obstruction of the L mainstem bronchus from bronchial carcinoid and subsequent imaging of post-pneumonectomy like syndrome. This manuscript would be acceptable for publication after the revisions below.

The following are my comments:

1. This manuscript would be strengthened by the inclusion of labelled histopathologic images of the carcinoid tumor. (minor essential revision)

2. If possible, the addition of a labelled coronal image of the chest CT should be added to the CT images. (minor essential revision)

3. Addition of a short review of atypical carcinoid in the discussion section would be helpful for the readers. (discretionary revision)

Please check the manuscript for spelling/grammatical errors.
