Reviewer’s report

Title: TRAIL signals through the ubiquitin ligase MID1 to promote pulmonary fibrosis

Version: 2 Date: 21 Oct 2018

Reviewer: Riitta Kaarteenaho

Reviewer's report:

Thank you very much for giving me the opportunity to evaluate the revised version of the manuscript of which I have some comments about the revised figures E1 and E2. Scale bars and/or magnifications of the images E1 and E2 is missing, which would needed to add.

Moreover, arrows indicating the observations in the figure E1 would be demonstrative. The revised figure E1B is not sharp. The higher magnification of the figure E1D would be recommendable.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
