Reviewer’s report

Title: Asthma and atopy prevalence are not reduced among former tuberculosis patients compared with controls in Lima, Peru

Version: 0 Date: 20 Jun 2018

Reviewer: Anna Maria Azzini

Reviewer's report:

An interesting and methodologically correct work that opens up new insights related to the immunophysiopathology of atopy and TB, despite not having, in my opinion, immediate practical repercussions from a clinical point of view

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
