Reviewer’s report

Title: The patient experience of pulmonary hypertension: a large cross-sectional study of UK patients

Version: 1 Date: 20 Dec 2018

Reviewer: Thenappan Thenappan

Reviewer's report:

This is a descriptive cross-sectional survey of adult patients with PH in the UK. The manuscript summarizes the results of the survey. The survey focussed on four key topics: time to diagnosis, quality of life, financial impact and specialist treatment and a follow-up financial impact survey from those responders who agreed to be contacted further.

The manuscript is well written and clear. The manuscript conclusions are supported by data. I have no additional comments.
