Reviewer’s report

Title: Nintedanib allows retreatment with atezolizumab of combined non-small cell lung cancer/idiopathic pulmonary fibrosis after atezolizumab-induced pneumonitis: a case report

Version: 0 Date: 23 Jun 2019

Reviewer: Kentaro Fukunaga

Reviewer’s report:

Thank you for the opportunity to review this interesting case reports of the inhibitory effect of nintedanib for acute exacerbation of idiopathic pulmonary fibrosis (IPF) due to immune checkpoint inhibitor (ICI) in a lung cancer patient with IPF. Please find the following comments.

1. Add a discussion of the mechanism how nintedanib suppressed triggered acute exacerbation of IPF due to ICI in the discussion part.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
