Reviewer’s report

Title: A Tricky And Rare Cause Of Pulmonary Eosinophilia: Myeloid/lymphoid neoplasm with eosinophilia and rearrangement of PDGFRA. A case report

Version: 1 Date: 21 May 2019

Reviewer: Deepak Aggarwal

Reviewer's report:

1. The abstract need reframing. The content mentioned in the subheading 'background' and 'case presentation' lack relevance
2. The authors have probably described an uncommon cause of eosinophilia. They should mention the extent of rarity /prevalence of such case by mentioning relevant figures from literature, both in the introduction and discussion section
3. The concluding lines are missing in the last paragraph of the discussion.
4. As the patient achieved complete remission after treatment, adding a follow up imaging figure for comparison will add strength to the case
5. The English Language used in the text need significant corrections and editing.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further
assessment in your comments to the editors.
