Reviewer’s report

Title: A Tricky And Rare Cause Of Pulmonary Eosinophilia: Myeloid/lymphoid neoplasm with eosinophilia and rearrangement of PDGFRA. A case report

Version: 1 Date: 05 Jul 2019

Reviewer: Ryuji Hayashi

Reviewer's report:

Authors reported a case of neoplastic eosinophil expansion with rearrangement of PDGFRA. They nicely present the case and readers could learn the management of those patients. I suggest several things to improve the paper.

Major
1. The title includes several genes rearrangement. But this is a case report and the title should be precise one.
2. This type of disease is rare. The incidence of this disease should be described based on references.

Minor
1. Page 4, line 36; Is the word, 'fewer', correct?
2. There are some different descriptions for the unit of leukocyte counts. They should be described in same manner. page 4, line 56, page 5, line 22.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
