Reviewer’s report

Title: A Tricky And Rare Cause Of Pulmonary Eosinophilia: Myeloid/lymphoid neoplasm with eosinophilia and rearrangement of PDGFRA. A case report

Version: 2 Date: 30 Sep 2019

Reviewer: Diego Maselli

Reviewer's report:

All my previous comments were adequately addressed. A final comment, can you please verify that 1500/mm3 is indeed what defines eosinophilia. Some authors classify eosinophilia based on severity. Mild 450-1500, moderate 1500-500, severe > 5000. This would be good to include to put in context the severity of the patient discussed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
