Reviewer’s report

Title: The predictive value of diaphragm ultrasound for weaning outcomes in critically ill children

Version: 2 Date: 18 Nov 2019

Reviewer: Chrissie Astell

Reviewer's report:

The authors have incorporated many of the changes suggested in previous reviews and I have no major outstanding questions. However, remaining phrasing/writing style issues should be addressed. Additional minor comments:-Pg 8 line 59 - pg 9 line 1: Should "DE < 0.86 cm H20/Kg" be PImax? -Supplementary table 1 isn't necessary since r and p values are presented in text.

Are the methods appropriate and well described?
