Reviewer’s report

Title: A case report of an unusual non-mucinous papillary variant of CPAM type 1 with KRAS mutations

Version: 1 Date: 16 Jan 2020

Reviewer: Gloria Pelizzo

Reviewer's report:

This short report is a well written paper, suitable for publication in BMC pulmonary medicine.

The report includes an important message: Cpam type 1, including thick walled multicystic air filled cysts larger than 2 cm in diameter, are strongly recommended for early surgery.

The mucinous clusters, as premalignant precursors for mucinous adenocarcinoma, have to be excluded at histopathologic evaluation.

Minor revision: B and C Ct scan figures could be presented under a better quality of images

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
