Reviewer's report

Title: Anterior cervical discectomy and fusion may be more effective than anterior cervical corpectomy and fusion for the treatment of cervical spondylotic myelopathy

Version: 2 Date: 11 November 2014

Reviewer: Mario Cabraja

Reviewer's report:

The authors provide a very well written Review article. Introduction, Methods section etc., everything is well, but unfortunately, many of the cited articles, are written in Chinese journals. Thus, it is hardly possible to assess the literature.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

No competing interests.
