Response to the editor:

We thank the editor for pointing out our manuscript for improvement.

Editor:

Your manuscript has now been assessed by our Editor. Most of the issues have been well addressed. However, there are a few remaining places for improvement. Please see Editor's comments (below):

"We note that you have included an additional author on the title page of your manuscript. Heun-Sik Lee was not included on the submission system and is not mentioned in the Authors' Contributions section. Changes in authorship In line with COPE guidelines, BioMed Central requires written confirmation from all authors that they agree with any proposed changes in authorship of submitted manuscripts or published articles. This confirmation must be via direct email from each author. It is the corresponding author’s responsibility to ensure that all authors confirm that they agree with the proposed changes. If there is disagreement amongst the authors concerning authorship and a satisfactory agreement cannot be reached, the authors must contact their institution(s) for a resolution. It is not the Editor’s responsibility to resolve authorship disputes. A change in authorship of a published article can only be amended via publication of an Erratum."

We thanks for the comments for manuscript improvement.

According to the editor’s very helpful comments, we added role of Dr. Heun-Sik Lee to the author’s contribution section as follows.

“HSL: manuscript writing of a part of discussion.”

Moreover, we attach the written confirmation from all authors that they agree with any proposed changes in authorship as follows. Confirmation files from each author were collected via the email.

We hope that after these corrections our manuscript will be acceptable for publication in BMC Musculoskeletal Disorders.
