Title: Comparison of tonic spinal cord stimulation and high-frequency and burst stimulation in patients with complex regional pain syndrome: a double-blind, randomised placebo controlled trial

Version: 2 Date: 25 July 2015

Reviewer: Elon E Eisenberg

Reviewer's report:

I have reviewed the revised version of the manuscript number 4345476351485680 entitled: Comparison of tonic spinal cord stimulation and high-frequency and burst stimulation in patients with complex regional pain syndrome: a double-blind, randomised placebo controlled trial.

All my comments to the original version of the manuscript have been properly addressed.

I don't have any further comments.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
