Reviewer's report

Title: Polymorphic variation of Hypoxia Inducible Factor-1 A (HIF1A) gene might contribute to the development of knee osteoarthritis

Version: 2 Date: 7 May 2015

Reviewer: W den Hollander

Reviewer's report:

The authors have appropriately addressed my concerns and I will thus recommend the manuscript for publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
