Reviewer's report

Title: Effect of low-level laser therapy (904 nm) and static stretching in patients with knee osteoarthritis: a protocol of randomised controlled trial.

Version: 2 Date: 20 March 2015

Reviewer: Ru-Lan Hsieh

Reviewer's report:

Minor Essential Revisions
1. The authors' response to number 1 comment should be presented in the text.
2. There was lack of records related to the analgesics and thermotherapy for pain control during the intervention periods. These factors would affect the study results.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
