Reviewer's report

Title: Reliability and validity of CDAI and SDAI in comparison to DAS-28 in Moroccan patients with rheumatoid arthritis

Version: 2 Date: 15 April 2015

Reviewer: Rahim Moineddin

Reviewer's report:

Major Compulsory Revisions
Authors grouped CDAI, SDAI, and DAS-28 into remission, low, moderate, and high activity and used Kappa statistics to assess their agreement. There groups are ordinal and it is better to use appropriate statistics such as Weighted Kappa or Kendall’s Coefficient of Concordance.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
