Reviewer’s report

Title: Metastasis of differentiated thyroid cancer in the subchondral bone of the femoral head: A case report

Version: 0 Date: 16 Aug 2015

Reviewer: Kimura A

Reviewer’s report:

The authors presented a rare case of thyroid cancer metastasis in the subchondral bone of the femoral head. The authors performed an operation based on the accumulation of 131 I in the left femoral head. I recommend the authors to add a brief discussion on the accuracy of 131 I WBS to detect metastases of differentiated thyroid cancer.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
