Title: Reducing the Failure Rate of Hip Resurfacing in Dysplasia Patients: A Retrospective Analysis of 363 Cases

Version: 1 Date: 09 May 2016

Reviewer: Ingo Banke

Reviewer's report:

After adequate revision with given explanations to my criticism (direct comparison of the two surgical techniques) and having detailed the limitations of the discussion section the scientific merit of this work should now provide a large enough contribution to the existing literature to justify publication in BMC Musculoskeletal Disorders. In conclusion, publication of this well written manuscript in BMC Musculoskeletal Disorders is now recommended without further concerns.
