Reviewer's report

Title: Tibialtocalcaneal (TTC) arthrodesis with reverse PHILOS plate and medial cannulated screws with lateral approach

Version: 0 Date: 28 Dec 2016

Reviewer: Ely Steinberg

Reviewer's report:

1. The Introduction is too long. Some advantages and disadvantages of various techniques were described, that should be moved to the Discussion chapter.

2. Figures should be separated: a. technique; b. x-rays, before and at last follow-up.

3. It is not clear if the obtained result was full consolidation or only pseudo-arthrosis.

4. The discussion should be supported by literature, especially in the second part of this chapter.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
