Title: Knee Pain and Related Health in the Community Study (KPIC): a cohort study protocol

Version: 2 Date: 29 Aug 2017

Reviewer: Erik Lenguerrand

Reviewer's report:

The authors have addressed most of my comments. The sample size and statistical analysis sections could still be improved further. I am still unsure why 10,000 participants are targeted when the different calculations are suggesting a sample ~10 times smaller.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
