Reviewer’s report

Title: Fatigue and disturbances of sleep in patients with Osteogenesis imperfecta -a cross-sectional questionnaire study

Version: 1 Date: 16 Dec 2017

Reviewer: John Gjevre

Reviewer's report:

The separate analysis of the study participants with sleep apnea vs no sleep apnea helps to strengthen this paper. It is interesting that the results did not significantly differ. While the sample size is small, it does suggest that OI itself contributes to these sleep symptoms and this paper helps to expand our knowledge of fatigue in this disease state. I look forward to future studies by the authors with additional assessments of sleep in OI patient (ideally with more sleep questionnaires and level 1 or 3 testing).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
