Reviewer’s report

Title: Manual therapy in the treatment of patients with hemophilia B and inhibitor. A case report

Version: 1 Date: 16 Oct 2017

Reviewer: Breanne Bovee

Reviewer's report:

Great article, I learned a lot and found it to be interesting with useful information for helping patients.

1. Adding what inhibitors are in the abstract would be helpful.

2. There are no references until the 4th paragraph, it would be beneficial to include references sooner.

3. Include more details on the case presentation such as the patients original pain levels, chronicity of pain, impact the condition has on his quality of life.

4. Add rationale for treatment decisions and references, possibly include a picture of it or elaborate on the explanation of the treatment.

5. The goal of the article is to evaluate the safety of manual physiotherapy, include how you evaluated safety.

6. Elaborate on line 46 page 6 or add it to the next paragraph.

Overall, great job.
Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
