Reviewer’s report

Title: Concomitant glenohumeral injuries in Neer type II distal clavicle fractures

Version: 1 Date: 19 Dec 2017

Reviewer: Bibek Banskota

Reviewer's report:

I think this paper highlights an important issue related to distal clavicle fractures. A larger sample follow up comparison would perhaps be able to predict which of the glenohumeral lesions would require surgical intervention at the outset.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
