Reviewer’s report

Title: Change in physical activity level and clinical outcomes in older adults with knee pain: A secondary analysis from a randomised controlled trial

Version: 0 Date: 03 Nov 2017

Reviewer: Gustavo Almeida

Reviewer's report:

The manuscript is very well written and easy to follow. This investigation is much needed as it adds to the body of the literature the benefits of physical activity participation.

I had a few comments for the authors to address before the manuscript is considered for publication in BMC-MD.

Page 8 (line 145): what is the definition of large and small improvements?

Page 8 (line 150): It seems that you have compared changes from baseline to 3 months and baseline to 6 months. Please add the description of computation of Baseline-6 months here.

Thanks and good luck with your research.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
