Reviewer’s report

Title: Tranexamic Acid in Total Shoulder Arthroplasty and Reverse Shoulder Arthroplasty: A Systematic Review and Meta-Analysis

Version: 1 Date: 28 Dec 2017

Reviewer: Wei Yang

Reviewer's report:

I agree with the options of the previous reviewers, and found all points have been adequately addressed in the revision. However, I have a few additional comments.

1. Line 133, page 9: some mean and variances were estimated from reported median, range, etc. Please indicate in the related figures/tables what specific ones have been inferred.

2. Line 148, page 10: "we also identified two ongoing trials". It is confusing that they were described with the other included studies but not reported later on. I suggest excluding them from this section but mentioning them only in the discussion section.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
