Reviewer’s report

Title: Oncological, surgical and functional results of the treatment of patients after hemipelvectomy due to metastases

Version: 1 Date: 04 Dec 2017

Reviewer: Andreas Mavrogenis

Reviewer's report:

Thank you for inviting me to re-review this case series. The paper has been improved, however, some issues remain:

I would ask the authors to clarify in their analysis (abstract and results) how did resection relate to survival of the patients. This requires a separate analysis of the patients who had wide/marginal resection versus those who had intralesional surgery. This would be a useful result from the present series, and should be clear from the abstract and conclusion of the paper.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
