Reviewer's report

Title: A Case of Bilateral Revision Total Knee Arthroplasty Using Distal Femoral Allograft-Prosthesis Composite and Femoral Head Allografting at the Tibial site with a Varus-valgus Constrained Prosthesis: Ten-year Follow up

Version: 1 Date: 12 Jan 2018

Reviewer: Kazunori Hino

Reviewer's report:
I have read revise manuscript with interest. However, the revision on the indication is not sufficient. These are necessary from my point of view for the understanding and readability.

You need to rearrange the figure visually and clearly.
It is necessary to present by separating left and right side. Especially, actual method to reconstruct large bone loss of right and left femurs is visually unclear. It is necessary to divide each of the left and right side and show it in figure.
Please divide each side and present it along the passage of time and replace the current figure position on the left and right side because of readability.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Unable to assess
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
