The aims of the study are stated clearly and the hypotheses are outlined. The study Population as well as the other methods seem appropriate.

The manuscript is well written, however, the introduction seems to be somewhat long. In my mind it would be beneficial to move parts of the introduction into the discussion section.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
