Reviewer’s report

Title: SAPHO syndrome with pathological fractures of vertebral bodies: a case report

Version: 0 Date: 07 Oct 2018

Reviewer: Khin Wee Lai

Reviewer's report:

the authors have written their treatment procedure clearly. All the patients' syndrome have been described well, laboratory testing results are clearly defined, including the biochemistry and hematology reports. Both CT and MRI scans have been conducted and judgment of SAPHO syndrome has been made systematically. The prescribed treatment mainly focused on pain relieving, discussion scope are reasonable, i personally think that the current manuscript does carry enough credit for possible publication as case report.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
