Reviewer’s report

Title: Risk factors for pulmonary complications after posterior spinal instrumentation and fusion in the treatment of congenital scoliosis: A case-control study

Version: 0 Date: 07 Jun 2019

Reviewer: John Albright

Reviewer's report:

This is a well done article that describes the occurrence of pulmonary complications of a series of congenital scoliosis surgeries.

The statistics are well done and valid. The conclusions are well supported. I have no questions/corrections that require attention

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
