Reviewer’s report

Title: Dorsal Subscapularis Approach for the Surgical Drainage of Subscapularis Intramuscular Abscess: A Case Report

Version: 0 Date: 20 Jul 2019

Reviewer: Yi Zeng

Reviewer's report:

I think this is a good case report with useful information for surgeon. I searched PubMed database and found seldom previous report reported the subscapularis intramuscular abscess disease. Furthermore, the authors used surgical drainage technique to cure the abscess. This method is innovative and less invasive than traditional open debridement. The writing is good, with some useful figures in the manuscript. I think this manuscript can be accepted in current form.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
