Reviewer’s report

Title: Dorsal Subscapularis Approach for the Surgical Drainage of Subscapularis Intramuscular Abscess: A Case Report

Version: 0 Date: 03 Sep 2019

Reviewer: Danielle Cristino

Reviewer's report:

This case review provided useful information regarding a rare procedure and is worthy of publication.

The authors did a nice job of comparing this case to the limited literature available describing treatment methods and surgical approaches for subscapularis intramuscular abscesses. Please consider providing clearer images for Figures 1 and 2. In addition, please consider word choice throughout the text. For example, the use of "pleasant" in line 117 seems inappropriate. If Figure 6 is not your original illustration, please provide credit for the source.

Thanks.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
