Reviewer’s report

Title: Arthroscopic rotator cuff repair with and without subacromial decompression is safe and effective

Version: 1 Date: 07 Jul 2019

Reviewer: Wasim Khan

Reviewer's report:

Good paper that addresses an important and clinically relevant question. It addresses the question of acromion type. Outcomes are measured adequately. Good method, follow-up and stats. Minor typos including the first couple of abstract sentences that I am sure will be picked up as the paper progresses.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
