Reviewer's report

Title: Transient Small Bowel Intussusception in an Adult: case report with intraoperative video and literature review

Version: 3  Date: 14 January 2015

Reviewer: Stefano Rausei

Reviewer's report:

Major Compulsory Revisions

Given the described clinical conditions of the patient, the surgical indication is not so clear.

Minor Essential Revision

The video has a low-definition and the intussuscepted bowel loop is not well-mobilized.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
