Reviewer's report

Title: A case of a nonfunctional adrenocortical carcinoma initially presenting as retroperitoneal hemorrhage

Version: 2 Date: 14 January 2015

Reviewer: sunil V jagtap

Reviewer's report:

1. Major Compulsory Revisions: The histopathological findings should be confirmed for diagnosis. (Figure 5 A, 5 B) are not representing the diagnosis. IHC confirmation may be made. As clinical and histopathological findings are not of definitive confirmatory diagnosis of many adrenal lesions.

2. Minor Essential Revisions:
   - Line no. 10 spelling mistake.
   - No. Of authors can be limited.
   - Line no 137- Specify the haemorrhage in ACC with recent references e.g. JCDR.
   - References should be made limited, precise & recent. e.g. ref. no. 3,4,5,9,14,19,20,21 may be modified or reduced.
   - Figures should be minimal & specific. e.g. HPE figure no 5 A, 5 B are not confirmamatory of histopathological diagnosis. Requires additional representative figures.

3. Discretionary Revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
