Reviewer’s report

Title: Safety of bioabsorbable implants in vitro

Version: 1 Date: 10 Nov 2015

Reviewer: Daniel Hernández-Vaquero

Reviewer’s report:

1. I thank to the first author about information on the scientific career and dedication to this topic of the second author. The word "chemist" should not be taken as something derogatory. In our environment is considered a pharmacist or person related and dedicated to the pharmacy and its downstream activities as pharmacovigilance. I apologize however to the author if my comments and the word "chemist" have bothered; It has not been my intention to underestimate their knowledge on the subject of the article.

2- My recommendation to the authors to present their work to other journals does not mean that the article is of low quality, I'm just calling to evaluate this possibility. A topic like this could be more interesting for other areas of research. My view is supported by checking the file of articles in this journal, directed to surgeons participating in clinical activities. I still think it's an item that does not fit exactly within the objectives of this publication. The editor, however, adequately assesses this opinion.

3-. I thank the authors for their response to my other reviews.
