Reviewer's report

Title: Single-stage transforaminal decompression, debridement, interbody fusion, and posterior instrumentation for lumbosacral brucellosis

Version: 0 Date: 14 Apr 2017

Reviewer: Qiang Zhang

Reviewer's report:
(1) The authors tried to investigate Single-stage transforaminal decompression, debridement, interbody fusion, and posterior instrumentation for lumbosacral brucellosis. It's potential interest, however the general quality of the manuscript is poor, and the English writing should be revised by a native English speaker.
(2) In addition, No postoperative lumbar CT in the part on the outcome.
(3) Please provide a short Running Title, a Statement of conflict of interest, an Abstract for the article;
(4) Deep wound infection in patients with sinus formation and wound surface infection patients suggested the analysis of the causes

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes
