Reviewer's report

Title: Single-stage transforaminal decompression, debridement, interbody fusion, and posterior instrumentation for lumbosacral brucellosis

Version: 0 Date: 11 Apr 2017

Reviewer: Feizhou Lv

Reviewer's report:
Single-stage TLIF with debridement was applied by the authors to treat 32 patients with lumbosacral brucellosis. VAS, ODI, JOA scores and other relative parameters were significantly improved according to the results, indicating that the authors had found an effective way to treat such patients.

Surgical treatment of lumbosacral brucellosis was rarely reported previously, as a result, spine surgeon may benefit from reading this paper. However, there have been some valuable reports published about spinal brucellosis management, therefore, they are necessary to be discussed in this paper and the authors should highlight the key points according to the results of this study when comparing to them.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

**Quality of written English**

Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

**Declaration of competing interests**

Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
