Reviewer’s report

Title: Preliminary experience in laparoscopic resection of hepatic hydatidectocyst with the Da Vinci Surgical System (DVSS): a case report

Version: 0 Date: 26 May 2017

Reviewer: Mahesh Chandra Misra

Reviewer's report:

Authors are reporting a case of hydatid cyst of liver. Was Cystopericystecomy was performed using DA VINCI Robotic System? We need details of the position of the patient, cause of bleeding, was cyst close to hepatic veins, was there any postoperative bile leak, did the surgeon use omentum to obliterate the cyst cavity, what energy source/sources were used? was it only ultrasonic energy or vessel sealing system was also used. Was any biliary channels seen while doing pericystectomy. was a abdominal drain placed and what was the nature of drainage fluid? Were prophylactic antibiotics used? Was the cyst injected with scolicidal agent? was there any spill of cyst contents?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:
