Reviewer’s report

Title: Severe anemia due to pharyngeal leech infestation; A case report from Ethiopia

Version: 0 Date: 01 Jun 2017

Reviewer: Hasan Yasan

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

It's an informative case report. However, a few corrections and explanations are necessary. I wonder the post-operative period of the patient from the point of view of remnant of leech and insisting bleeding. Removal of the leech requires special care and the utmost gentleness because it attaches strongly with its suckers. Because of its soft and slippery body surface, which ruptures easily, it is difficult to hold a leech with forceps. Firm traction should not be used to pull the leech off because this leaves some of the mouth parts behind, leading to persistence of bleeding and secondary infection. The removal of larneal leech needs a special technique. It's better to discuss this technique for the informative aspect of case presentation.

References should be corrected according to the journal manuscript system (the order of surname and name, etc)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

**Quality of written English**
Please indicate the quality of language in the manuscript:

Acceptable

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
