Reviewer’s report

Title: Effective and rapid treatment of wound botulism, a case report

Version: 0 Date: 12 Sep 2017

Reviewer: Francesco Giuseppe De Rosa

Reviewer’s report:

this is a good report, with few misspellings:

C. botulinum always in italic

Lyne 27 "were" instead of "where"

Lyne 34 "all in all" is not understandable

I do not have other specific comments, I believe that the following reference should be added, as an example of perhaps a low inoculum infection, treated without the antitoxin.

Please add the reference:

De Rosa FG, Stella ML, Astegiano S, Corcione S, Motta I, Decastelli L, Di Perri G. Wound botulism after traumatic open fracture in Italy

best regards

FDR

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
