Title: Recurrence in Unicentric castleman's disease postoperatively: a case report and literature review

Version: 0 Date: 04 Sep 2017

Reviewer: Umberto Bracale

Reviewer's report:

Dear Authors,
Congratulations for your interesting case report.
However there are some corrections as following reported:

1) The term "recrudescence" probably is better to modify with "relapse" or "recurrence" (line 58-59…)
2) The sentence on page 4 of Discussion (Line 48) is not clear...."Clinical Symptoms of UCD are closely...". We don't understand the term "sita".
3) Also the sentence at Line 8-9 on Page 6 is not Clear: "While UCD with hyaline vascular type...."
4) You should better explain the surgical technique and the postoperative course.
5) You should explain why you have not used a thoracoscopic approach.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
