Reviewer’s report

Title: Arteriovenous malformation in the sigmoid colon of a patient with Cowden disease treated with laparoscopy: A case report

Version: 0 Date: 12 Mar 2018

Reviewer: Sofia Lopes

Reviewer’s report:

A good case report with rare features of the genetic disease.

However:

- PTEN mutation could have been screened since most of the diagnostic criteria in this patient are minor criteria, with no mention to the number of the fibromas present.

- Histologic figure should have a better image quality.

- English showed be improved.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
