Reviewer’s report

Title: Abdominal wall complications following renal transplantation in adult recipients – factors associated with interventional management in one unit

Version: 0 Date: 17 Nov 2018

Reviewer: Massimiliano Veroux

Reviewer's report:

The authors reported the incidence of abdominal wall complications in a series of kidney transplant recipients. Although their findings are not completely new the manuscript is well written and reports some interesting data.

The authors reported that no patient received everolimus as primary immunosuppression..did they note any correlation with the other immunosuppressants? Again, they reported a higher incidence of abdominal wall complications in patients with infections. This should be better detailed ..which kind of infection? How was it assessed? Did patients receive antibiotic prophylaxis? Did the presence of infection influence the choice of using the npwt?

With regard of surgical procedures, it needs more details : did the authors used prosthetic repair in kidney transplant recipients and in which patients, on the basis of theor experience this treatment could be more indicated?

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

**Quality of written English**
Please indicate the quality of language in the manuscript:

Acceptable

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
